AMATEUR HOTOGRAPHY

tography, must be in not after the Tuesday. Amateurs are requested to send prints from their notable negatives, giving particulars of de-velopment, exposure, etc. Their work will be criticised and sugges-

After the late snow storm, and while the trees and everything out-of-doors vere covered with countless millions of akes, the amateur camerists of Wheelisg were industriously engaged in securing photographic reproductions of the thousand and one beautiful snow papes that were beheld on all sides Many plates have been developed and not a few beautiful negatives and prints have been produced. In this class of or the exposure—in nearly ce there is an over-expos-caused by the brilliancy of time given the course is every instance there is every instance there is every instance there is every instance of ure. This is caused by the brilliancy of ure. This is caused light from the sa consequence a very short exposure is needed, just as in marine views where is so much reflected light from the there is so much reflected light from the

TWO GLARING FAULTS.

Says C. F. Giffen: Were I to give from my experience a suggestion that rould contribute to more accurate and careful work it would be that the amateur, as a rule, has two glaring faults. The first is a chronic state of being in nd the second a lack of pr hurry and the second a lack of the sion in his work. I had that, after the simple of the side of the s oye, I should feel was justly called dd blundering," that in so many in-es I neglected to adjust the stop, to set the shutter or draw the slide at the proper time. Using a tripod and focusing cloth, it rarely occurs that there is any trouble with the focus. That appears to be in all cases the first motion. But it is the other little manipulations that make the trouble, and find that without a uniform rule and system one cannot always count upon the result. It seems to me that if there is fixed in the mind a certain order of proceeding, better and more satisfactory results will be obtained. I follow this rule—focus the subject, adjust the stide and press the bulb.

I hope the suggestions offered may slid others who have failed for want of careful system. shutter or draw the slide at r time. Using a tripod and

TO SOUFEGEE PRINTS.

Prints intended for squeegeeing on terrotype plate, by washing in running water, often gather sand and other solid particles in the water, owing to the adhesiveness of the gelatine surface of the print. The picture will show a pock-marked, glassy surface, the defects be-ing more noticeable owing to the high poilsh following this process. Take the print out of the water, lay it face up on glass plate or old negative, and wipe off print surface with a dripping wet soft spange, then lay on ferrotype plate for squeegeeing, and you will secure a per-fectly smooth, almost mirror-like sur-face. hesiveness of the gelatine surface of the

MAKING DEVELOPER.

To any amateur photographer who desires to get satisfactory results, I would say learn to make your own developers and do not depend on those you purchase in the supply stores. The process is not difficult to learn, and when once learned does not require much once learned does not require much time or trouble. And the satisfaction of obtaining a good, clear, sharp negative will far more than repay the trouble of mixing the fresh developer. I have found that Pyro developer that has stood more than twenty-four hours does not always work well. Not only can an amateur do more satisfactory work by amateur do more satisfactory work by making his own developer fresh as re-quired, but it is considerably cheaper than buying it. The greatest expense being at the start, when it will be sary to buy a hydrometer, which will cost about 60 cents, and a small balance scale, at a cost of about 75 cents, for weighing the Pyro. I will be pleased to who may wish to know ore on the subject.

T. D. BURNHAM.

THE MONETARY COMMISSION Eas a Hearing-Ex-Senator Edmunds

Addresses the House Committee

WASHINGTON, D. C., Jan. 12 .- The monetary commission was given a hearing to-day by the house committee on banking and currency, on the commissions bill proposing a comprehengive revision of the currency. Ex-Senator Edmunds, of Vermont, chairman of the commission, headed the delegation and with him were ex-Secretary of the Treasury Fairchild, of New York; J. W. Fries, of North Carolina, representng the gold Democratic sentiment of

W. Fries, of North Carolina, representing the gold Democratic sentiment of the south; T. J. Bush, of Alabama, and Judge R. S. Taylor, of Indiana, representing the middle west. Secretary Gage was also present, accompanied by the solicitor of the treasury. The hearing attracted much interest, a number of the members of the house, accompanied by ladies, being present.

Mr. Edmunds was the first speaker. He said that the fundamental principle which the commission had felt was to be considered in establishing a stable currency was, first, to know what the standard of value in this country is and is to be. On this there were many divergent views among financial authorities. Many believed and he was one of these, that it was impossible to have more than one standard of value. It this be true, then the question is, what is the best standard? The experience of the world, Mr. Edmunds said, was that the best standard was the one subject to least change, one to which all other values most readily adjusted themselves; one which will be the same when a transaction closes as it was when it opened. The commission felt that such a thing as a double standard had never existed in the world through natural operations. There had been double standards established by law, but never in fact. When it came to an actual standard there could be but one.

Mr. Edmunds referred to the experience of the great nations of the world, all showing, he said, that a single standard and meant stability and safety, while geal attempts at double standard. Mr. Edmunds referred to the experience of the great nations of the world, all showing, he said, that a single standard meant stability and safety, while Igeal attempts at double standards meant disaster and panic. From this universal experience Mr. Edmunds said he and his associates had come to the conclusion that the first principle on which to base a currency was to have one standard; that gold is the best standard, because it is the most stable of all standards of value. Feeling that one standard was essential and that gold was the best of these, the commission was brought to the gold standard as their first proposition. That, however, did not exclude the idea of bimetallism, for it did not exclude the use of filver or any other metal to the largest extent that they could be maintained on an equality with the one fixed and invariable standard of gold.

"That conclusion was reached," Mr. Edmunds added, "with no private political considerations

but solely from the conviction of these of the commission representing the var-ious sections of the country."

WILL CHANGE PLACES.

WASHINGTON, Jan. 12.--An ard Charles Page Bryan, of Illinois, nominated to be minister to China, and ex-Rep resentative Conger, of Iowa, our mini-ter to Brazil, will exchange posts. The Bryan's confirmation on the ground that he had no diplomatic experience and was not equipped for so important a post as that of minister to China is likely to be during the present administration, in view of the European scramble for position in China. Mr. Conger was minister to Brazil during the Harrison administration and was regarded as one of the strongest and best of our foreign representatives. The nominations making these changes will be sent to the senate shortly. It is believed there will be no opposition to confirmation of either gentleman.

THAT \$100 COUNTERFEIT.

WASHINGTON, Jan. 12.-Mr. Claude M. Johnson, superintendnt of the bu-M. Johnson, superintendnt of the bureau of engraving and printing, to-day in an interview said: "In order to correct statements which have appeared in the public press to the effect that the plate from which the counterfeit \$100 silver certificate was printed came from the bureau of engraving and printing or from an impression surreptitiously taken from the genuine plate. I desire to state that the most careful examination by the best experts has been made of this note and unmistakable differences between the genuine and the counterfeit are apparent. The public are assured that this note was not printed from the genuine plate or from any impression taken from that plate, but is entirely counterfeit."

WE often hear people say there is only one good cough medicine and that is Dr. Bull's Cough Syrup, the specific for cold.

FINANCE AND TRADE.

The Features of the Money and Stock Markets.

NEW YORK, Jan. 12.-Money on call steady, actual transactions ranging 21/2 to 3 per cent; last loan 3 per cent; closing bid 21433 per cent. Prime mercantile paper 314@414 per cent. Sterling bankers' bills at \$4 84% @4 84% for demand and at \$4 82%@4 82% for sixty days. Posted rates \$4 83@4 83% and \$4 8514@4 86. Commercial bills \$4 81% Silver certificates 574@58c. Bar silver 5714c. Mexican dollars 4614c.

To-day's market for securities was of much the same character as yester-day's. The principal interest was cen-tered in Union Pacific and a number of tered in Union Pacific and a number of its affiliated companies and Northern Pacific, which were the leading factors of strength, while on the other hand Sugar continued under a weight of depression, as was the case yesterday. A new feature of special strength was Chesapeake & Ohio, which advanced a point on heavy buying. Transactions were on a very large scale and the heavy dealings of large operators, backed by the powerful interests were manifest all through the market. These large operations attracted a considerable following both amongst the smaller traders and from outside sources. Commission house business was in text outperfections. Commission house business was in fact quite noticeable in the day's trad ing. It was obvious, however, that re alizing on a large scale was going on in different parts of the list coincidentaldifferent parts of the list coincidentally with the strength in other parts. A
striking example of this process was
seen in the two Northern Pacific stocks,
the common being advanced over a
point while realizing in the preferred
carried it before the close below last
night's last sale. The Grangers outside
of St. Paul will also be seen to reflect
a supply of stock fully equal to the demand. The anthractic coalers were
weak and continued the decline, but
the Ohio soft coal roads maintained
their recent show of strength. Union
Pacific rose at one time over 2 points,
but recent buyers commenced to take
profits as soon as a report was published that the new company had secured
tontrol of Oregon Short Line. The
stock reacted over a point. The recent stock reacted over a point. The recent strength of the stocks of the disintegra-ted portions of the old Union Pacific system is fully explained by to-day's

ted rortions of the old Union Pacific system is fully explained by to-day's announcement. This buying was evidently founded on a belief in farreaching plans of combination and extension which, according to some prevalent rumors, will embrace one vast system from the Atlantic to the Pacific. Much was made in the market on a reported bond issue by the Chesapeake & Ohio, though the view of benefits to accrue seems to be somewhat exaggerated considering the amount of transactions. Advances from the London and Continent markets, showed the tone of American securities in the foreign financial markets to be excellent. London bought in this market no dess than twenty thousand shares of the favorite international stocks and the marked strength of Union Pacific, Denver, Rio Grande preferred and Northern Pacific was directly attributable to this demand. The weakiness in Sugarseemed to be connected with the annual meeting of directors in progress to-day, though no news regarding the company reached the public. Money declined to yield to-day, below 2½ percent, but the tone of the market reflected the prevalent feeling that rates will yield in the near future. Large amounts of money also found their way into investment and speculation to-day. The available possibility of relief to the of money also found their way into investment and speculation to-day. The available possibility of relief to the money market was indicated by the fall of \$4c\$ in posted rate of sterling exchange and the decline of \$2c\$ in the change and the decline of 2½ in the actual rates, the decline not being prevented by the expected arrival to-morrow at San Francisco of another \$1,09,-000 in gold from Australia. The par value of to-day's transactions in bonds is not as large as that of gesterday, but business was remarkably well distributed all through the list. Gains were the rule, but there were some declines. To-

tal sales, \$4,775,000.
United States old 4's coupon and the 2's were ½ per cent higher bid to-day. There was a sale of the new 4's coupon at 1293, which is the highest on record. Evening Post's London financial cablegram:
There was less activity in Grand Trunks and Canadian Pacifics in the stock market here to-day and increased animation and strength in Americans and Argentines, particularly in Argentines.

CHICAGO-Wheat to-day lost all the advance it acquired yesterday and sold 31.6% decline. The market received some support from the Leiter interests by weak news and general apathy of traders, resulted in a decline in spite of this buying. Corn dropped 40%c in sympathy. Oats closed a shade lower.

sympathy. Oats closed a shade lower. Provisions were the only strong market on the floor and advanced 5@10c.

Opening prices for wheat showed a slight decline, May starting at 90½@ 90½c, as compared with yesterday's close of 9tc. This was because Liverpool showed a very small advance in response to the gain here yesterday and Paris opened weak and lower. Then the western receipts were again too heavy to be a comfort to bulls and small receipts here were the only circumstances that they could claim in cumstances that they could claim their favor. Trading was restricted by the general bearishness of the speculathe general bearishness of the specula-dive crowd, which prevented them from buying and their timidity at the same time of being caught short under the well known threatening local condi-tions that now exist. For a short time after the opening the market did show some strength. Brokers for the Leiter interests were fair buyers at 90% and their example in this respect was fol-lowed by some of the small fry, the price as a result advancing to 91%c. Rumors that the French duty on grain was about to be reduced were persistently circulated at the opening and helped in the advance. Denials soon and helped in the advance. Denials soon became so unanimous, however, that the crowd dropped the tariff reduction became so unanimous, nowever, that the crowd dropped the tariff reduction as a motive for the decline at Paris and the market here eased off from that time. Chicago received eighteen cars. Minneapolis and Duluth received 367 cars, against 333 on the same day of the week before and 213 the corresponding day of last year. The receipts at western primary markets were 420,000 bushels, against 230,000 bushels the corresponding day of the year before. Liverpool advance was only 34d percental and Paris opened from 5 centimes to 15 centimes lower. Beerbohm cabled that Argentine wheat sold at 33s 64, or the equivalent of \$1 0014, and that cargoes of that wheat were being freely offered to arrive. On the other hand the Minneapolis dispatches reiterated their constant theme of coming scarcity in neapolis dispatches reiterated their constant theme of coming scarcity in

constant theme of coming scarcity in that region.

The export clearances of wheat and flour from the Atlantic ports amounted to 445,000 bushels. Closing cables brought lower quotations from continental markets, while Liverpool closed about ½4 lower for next crop futures, September showing ¼4 advance. Paris, quoted flour for this month's delivery 45 centimes lower and for March-May 15 centimes higher; wheat 5 centimes lower for both immediate and remote deliveries; Antwerp 25 centimes lower for American red and 12½ centimes lower for Walla Walla. The price of May fluctuated between 90%c and 91c for the greater part of the session and for the greater part of the session and at 1 o'clock was selling at 90%c. In the last fifteen minutes of the session sup-port almost entirely disappeared and operators who had become "long" on the early French rumors held considerable difficulty in unloading. May de-clined %c, but rose rapidly in conse-quence and was quoted at %@1/2c at

clined %c, but rose rapidly in consequence and was quoted at %@%c at the close.

Corn was very quiet. The market was quiet at the opening with wheat. It turned firm on the prospects of a cold wave, but turned casy again as wheat declined and showed weakness for the rest of the session. Shorts who covered yesterday, did the selling to-day. May ranged from 25%c to 29c, and closed %@%c lower at 25%c294c.

%c lower at 29@29%c.

The market for cats was slow. Some firmness was shown at the opening under fairly good buying by commission der fairly good buying by commission houses and on the good cash demand, but later prices fell off with wheat and corn. May ranged from 23%c to 23%c and closed a shade lower at 23%G23%c. Trovisions were strong throughout. Much lighter receipts of hogs than expected started the market at small advances all around. Some reaction followed, but at the concession there were plenty of buyers and a second and more material advance quickly ensued. The market was well supported to the end. May pork closed 12½c higher at \$9.50; May land 5c higher at \$4.50 and May ribs 10c higher at \$4.80. Estimated receipts Thursday; Wheat, 37 cars; corn, 410 cars; oats, 330 cars; hogs, 37,000 head.

330 cars; hogs, 37,000 head.

Live Stock.

CHICAGO—There was an active general demand for cattle and a stronger market from the opening to the close. Desirable lots sold 10@15c higher and market from the opening to the close. Desirable lots sold 100/15c higher and even the common and medium grades sold better than Monday or Tuesday, as buyers were forced to substitute them for good steers. While there was an occasional sale around \$3 85, \$4 00 was about the lowest price paid orinarily for dressed beef steers, and fancy shipping cattle were worth \$5 4005 50. Sales were largely at \$4 5005 50 and exporters took a good share of the good, Iat, heavy cattle. The stocker and feeder trade was active, sales being chiefly at \$3 7504 25. Prime feeders brought \$4 30 Q4 37½. Cows and helfers were active at strong prices and exporters bought good buils at \$3 504 00. Calves sold chiefly at \$5 7506 25. Prices for hogs advanced 5c under a very lively general demand. Very few hogs were left in the pens last night and to-day's offerings were well taken at \$3 4503 70 for common to choice lots, the greater part bringing \$3 5502 55. Prices ald chiefly at \$3 35@3 55. There was a good de mand for sheep and lambs from slaugh mand for sneep and tames from staugnterers and prices were mostly steady at \$3 0004 50 for inferior to choice sheep and \$4 00075 75 for poor to prime lambs. Lambs sold mainly at \$5 00075 65, few going below \$4 50. Yearlings \$4 504 90. Receipts, cattle 11,000 head; hogs 30,000 head; sheep 15,000 head.

EAST BUFFALO-Cattle were about EAST BUFFALO—Cattle were about steady. Hogs, Yorkers, good to choice \$3.70@3 72½ roughs, common to choice choice \$3.10@3 25; pigs, good to choice \$3.50@3 60. Lambs, choice to extra \$5.70@5 80; culls to common \$4.25@5.25; sheep, choice to selected wethers \$4.65@4.90; culls to common \$2.50@3 75.

EAST LIBERTY — Cattle steady prime \$4 90@5 00; common \$2 25@3 60 bulls, stags and cows \$2 00@3 70. Hogs active at unchanged prices. Sheep slow; choice \$4 60@4 70; common \$3 25@3 75; choice lambs \$5 75@5 85; common to goods \$4 50@5 60. Veal caives \$6 50@7 25.

CINCINNATI-Hogs active at \$3 00@ 3 65.

BOSTON-The American Wool and Cotton Reporter will say to-morrow of the wool market: The sales this week the wool market: The sales this week have fallen off nearly 57 per cert from the previous week. Notwithstanding this fact, the market is possessed of more interesting features now than then. Though much less active, it is a broader market. Where a short time since a half dozen gigantic mills were absorbing all attention by reason of their eagerness to pick up round amounts of staple territory, there is now a widespread inquiry from mills of every class for wool of a great many different grades and better inquiry is highly indicative of an active market in a very short time. Territory wools, especially those having staple in them, have been inquiring for, as have certain lines of fleeces, pulled wools and greasy capes. Prices are fully as firm greasy capes. Prices are fully as firm as a week ago and in some cases are more so, notably in delaine wools, large business is anticipated by every body within a few weeks and there consequently every inducement to keep quotations at a high figure. The eales of the week amount to 2,236,000 pounds domestic and 1,072,000 pounds foreign, making a total of 3,08,000 against a total of 7,650,000 for the previous week.

NEW YORK-Wool steady.

Metals.

NEW YORK—The New York metal market is variable with a weakening undertone. The metal exchange calls pig iron warrants very dull at \$6.60 bid and \$6.70 asked. Lake copper easier at \$10.85.bid and \$19.55 asked. Thi firmer at \$12.80 bid and \$13.85 asked. Spelter quiet and unchanged at \$3.90 bid and \$4.00 asked. Lead weak at \$3.00 bid and \$3.65 asked. The firm that fixes the settling price for miners and smelters calls the lead market weak at \$3.65.

Dry Goods.

NEW YORK—The dry goods market with its call conditions was rendered more strikingly quiet to-day by dismal weather conditions, which kept local buyers at their own places of business. The print cloth market is reported dull.

Petroleum.

OIL CITY—Credit balances 65c. Cer-tificates, sales of regular at 66c; closed at 664c bid. Shipments 63,736 barrels; runs 99,287 barrels. "CURE the cough and save the life."

Wood's Norway Pine Syrup cures ghs and colds, down to the very verge of consumption.

IT is casy to catch a cold and just as easy to get rid of it if you commence early to use One Minute Cough Cure. It cures coughs, colds, bronchitis, pneumonia and all throat and lung troubles. It is pleasant to take, safe to use and sure to cure. Charles R. Goetze, Market and Twelfth streets; Chatham Sinclair, Forty-sixth and Jacob streets; A. E. Scheehle, No. 607 Main street; Excley Bros., Penn and Zane streets; Bowle & Co., Bridgeport. Piles! Piles! Itching Piles.

Piles! Piles! Hehling Piles.

SYMPTOMS—Moisture; intense liching and stinging; most at night; worse by scratching. It allowed to continue tumors form, which often bleed and ulcerate, becoming very sore. SWAYNE'S OINTMENT stops the liching and bleeding, heals ulceration, and in most cases removes the tumors. At Cruggists, or by mail, for 50 cents. Dr. Swayne & Son, Philadelphia. tths&w
